

MUTHURAJ J

Senior Software Engineer | Full Stack Developer

📍 Chennai, Tamil Nadu | 📞 +91 99940 35966 | ✉️ muthuraj.office@gmail.com

🔗 Profile: <https://muthuraj-engineer.github.io/Portfolio>

Summary

Senior Software Engineer with 8+ years of experience in designing, developing, and supporting enterprise web applications, cloud solutions, and AI-powered business applications.

Expertise in C#, ASP.NET Core Web API, Angular, TypeScript, SQL Server, Microsoft Azure, and Azure DevOps. Proven experience in application modernization, Microsoft Entra ID, Azure RBAC, secure authentication, and production support.

Hands-on experience with Azure OpenAI, Retrieval-Augmented Generation (RAG), Prompt Engineering, Copilot Integration, and Agentic AI to build intelligent, scalable, and business-driven solutions. Strong track record of delivering high-quality applications, optimizing performance, and collaborating with cross-functional stakeholders.

Technical Skills

Backend:	C#, ASP.NET Core Web API, ASP.NET MVC, Dapper, Entity Framework, LINQ, REST APIs
Frontend:	Angular, TypeScript, JavaScript, HTML5, CSS3, Bootstrap
Database:	SQL Server, Azure SQL, Query Optimization, Data Migration, SSRS, Audit Design
Azure & DevOps:	Azure App Service, Blob Storage, Microsoft Entra ID, Azure Key Vault, Azure RBAC, Azure DevOps, CI/CD, Git
Integrations & Tools:	Azure OpenAI, Retrieval-Augmented Generation (RAG), Agentic AI, LLM Integration, Copilot Integration, MuleSoft, ServiceNow, SFTP, JWT, SonarQube, AppDynamics, AI-Powered Enterprise Applications, Automation Testing in Playwright.
Methods:	Agile/Scrum, Requirement Analysis, System Design, Code Reviews, Release Planning, Coordination with Business Analyst

Work Experience

LTIMindtree Senior Software Engineer	(Apr 2022 – Present)
- Lead development, enhancement, deployment, and production support for enterprise applications using .NET Core, Angular, SQL Server, Dapper, and Azure services. - Migrate Azure SQL Database and Blob Storage authentication from legacy keys and connection strings to Microsoft Entra ID, Managed Identity, and Azure RBAC. - Design and optimize stored procedures, APIs, database objects, audit processes, and bulk Excel upload workflows for reliability and performance. - Implement secure configuration, token-based authentication, role-based authorization, session controls, logging, and secret-management improvements. - Designed and developed RAG-based document and knowledge retrieval solutions. - Implemented Azure OpenAI integration for enterprise AI capabilities. - Developed prompt-engineering approaches for intelligent business workflows. - Evaluated and implemented Agentic AI concepts to automate repetitive business processes. - Built AI-assisted features using Azure OpenAI and enterprise data sources. - Coordinate with business, QA, cloud, network, and support teams to resolve authorization, firewall, upload, deployment, and environment issues. - Perform code reviews, mentor developers, prepare technical and test documentation, conduct knowledge-transfer sessions and support sign-off activities.	

Audex Solutions and Technologies Pvt. Ltd. | Software Developer (Dec 2017 – Apr 2022)

- Developed full-stack web applications for warehouse management and enterprise workflows using ASP.NET, .NET Core, Angular, JavaScript, and SQL Server.
- Built REST APIs, reporting modules, Excel import/export features, SSRS reports, SFTP integrations, and real-time tracking capabilities.
- Participated in requirement analysis, database architecture design, stored-procedure development, IIS deployment, and production support.
- Improved query and stored-procedure performance and supported releases from development through production with minimal disruption.

Key Projects**MARS – Metrics & Analytics Reporting System (May 2025 – Present)**

Enterprise platform supporting metrics, analytics, file processing, dashboards, and reporting workflows.

Key contributions: Lead enhancements and production support, coordinate deployments and sign-offs, implement Entra ID and Azure RBAC for SQL Database and Blob Storage, troubleshoot authorization and Session management, prepare scope, test and release documentation.

Technologies: Angular, ASP.NET Core, .NET 6, Dapper, SQL Server, Azure App Service, Blob Storage, Entra ID, Azure OpenAI, Retrieval-Augmented Generation (RAG), Agentic AI.

SCM – Supply Chain Management (Feb 2024 – May 2025)

Enterprise supply-chain platform supporting procurement, conversion, logistics, and information flow.

Key contributions: Implemented configurable Excel upload, improved processing performance, developed APIs, supported application modernization, database changes, code optimization, and production releases.

Technologies: .NET Core, Angular, SQL Server, Azure App Service, REST APIs.

ResolveIT (Oct 2023 – Feb 2024)

Workflow solution supporting incident, change, asset, self-service, and service-management processes.

Key contributions: Implemented Microsoft token acquisition, Active Directory verification, IP and login-audit tracking, session validation, and secure persistence of authentication details.

Technologies: .NET Core 6, ASP.NET Core Web API, SQL Server, Angular, Microsoft Identity Services.

GLM - Global Master (Nov 2022 - Sep 2023)

Enterprise data-maintenance solution supporting operational, employee, logistics, and audit workflows.

Key contributions: Created dynamic maintenance pages, cross-database migration processes, Azure data flows and pipelines, complex reporting stored procedures, web jobs, and transaction-level audit handling.

Technologies: .NET Core, Angular, SQL Server, Azure Data Services, Web Jobs.

MyLTC (Apr 2022 - Sep 2022)

Internal employee application supporting attendance, leave, transfers, and ServiceNow-related workflows.

Key contributions: Developed modules, migrated .NET Framework functionality to .NET 6, integrated APIs, supported users, and improved application flows.

Technologies: .NET 6, ASP.NET Core Web API, Angular, SQL Server, ServiceNow

Raymond Warehouse Management System (Dec 2017 – Mar 2022)

Warehouse-management platform covering sourcing, procurement, tracking, reporting, and product delivery.

Key contributions: Developed application modules and SSRS reports; implemented SignalR-based tracking and mapping integration; exchanged data through SFTP; supported Excel and database workflows.

Technologies: ASP.NET, .NET Core, Angular, SQL Server, SSRS, SignalR, SFTP

Education

Master of Computer Applications (MCA) | Sri Manakula Vinayagar Eng. College 2017

Bachelor of Computer Applications (BCA) | St. Joseph's College of Arts and Science 2014
